

# RECENT ADVANCES IN FEMALE FERTILITY PRESERVATION-NAVIGATING NEW FRONTIERS

## MAUSUMI DAS

*Division of Reproductive Medicine, Department of Obstetrics and Gynaecology, Hammersmith Imperial College Healthcare NHS Trust and Chelsea and Westminster Hospital NHS Foundation Trust, UK*

Recent advances in management strategies and emerging innovative technologies have provided a paradigm shift in our approach to fertility preservation in female patients. This talk focuses on recent advances and state-of-the-art applications in this rapidly expanding field. It will explore advances in chemoprotection for gonads, optimizing ovarian stimulation protocols, oocyte and ovarian tissue cryopreservation, ovarian transposition, pregnancy outcomes in cancer survivors and the importance of counselling and an inter-disciplinary approach to optimize management.
